20-02-2018, 01:43 xGen: Rendering with a Teraforce What's New in xGen: Rendering with a Teraforce 2.3.1 release, February 22nd, 2016. As always, I would love to see what people create with xGen: Rendering with a Teraforce. So how about posting your creations in this thread? Leave a link to your xGen thread in your user page if you wish, and I can post it on the page, and then we can all enjoy your creations. And a special thanks to. Doudou for the great new default coloration option! Allan for the bugfix that fixes the bug where the gradient vanishing point got stuck in the wrong place when snapping the wiggles to a texture. Thanks to everyone who helped and contributed with this release, and here is hoping that 2016 will be a wonderful year for all of us in the community. Renders are saved on local drive, not the server in Local Material and. With the release of Arnold 2016, I have returned to the project to finish it off. The final touches are being added now. Both PSD and Zbrush will have the completed workflow by the end of the year. I am hoping to add a tutorial showing how to render to Arnold as well as my workflow in the near future. For those interested in the Arnold workflow, I have a step by step post on my blog.
